SIPeS

RRID:SCR_010865

Type: Tool

Proper Citation

SIPeS (RRID:SCR_010865)

Resource Information

URL: <http://gmdd.shgmo.org/Computational-Biology/ChIP-Seq/download/SIPeS>

Proper Citation: SIPeS (RRID:SCR_010865)

Description: An algorithm that allows researchers to identify transcript factor binding sites from paired-end sequencing reads. SIPeS uses a dynamic baseline directly through the piling up of fragments to effectively find peaks, overcoming the disadvantage of estimating the average length of DNA fragments from singled-end sequencing achieving more powerful prediction binding sites with high sensitivity and specificity.

Abbreviations: SIPeS

Synonyms: SIPeS - Site Identification from Paired-end Sequencing, Site Identification from Paired-end Sequencing

Resource Type: software resource

Defining Citation: [PMID:20144209](#)

Availability: Free to academic users, Non-commercial, Commercial requires permission

Resource Name: SIPeS

Resource ID: SCR_010865

Alternate IDs: OMICS_00462

Record Creation Time: 20220129T080301+0000

Record Last Update: 20260912T195725+0000

Ratings and Alerts

No rating or validation information has been found for SIPeS.

No alerts have been found for SIPeS.
