Proper Citation: Region to Region (RRID:SCR_016995)

Description: Software tool as a framework for fitting and describing connectivity patterns between regions that is a simple extension from the current population receptive field models in the visual neuroscience literature. The connectivity from each voxel in a designated seed region to a mapping region is modeled as a 3-dimensional Gaussian, providing location parameters and spread parameters. This allows the direct description of the relative mapping from one region to another.

Synonyms: 3-D Connective Field Modeling Toolbox

Resource Type: data processing software, software application, software resource

Keywords: connectivity, pattern, region, neuroinformatics, region, receptive, field, model, visual, neuroscience, voxel, mapping, 3D, parameter

Availability: Free, Available for download, Freely available

Resource Name: Region to Region

Resource ID: SCR_016995

Record Creation Time: 20220129T080333+0000

Record Last Update: 20260905T133052+0000

Ratings and Alerts

No rating or validation information has been found for Region to Region .

No alerts have been found for Region to Region .
