Proper Citation: Leica: DMI6000 B inverted microscope (RRID:SCR_018713)

Description: Inverted microscope for biomedical research. Offers Differential Interference Contrast for relief imaging of specimens with varying indices of refraction. Used for fluorescence, live cell, time-lapse imaging, high-speed multi-fluorescence optical sectioning, and micromanipulation. Features automated contrast and illumination manager, motorized Z focus, parfocality function, automatic brightness and diaphragm adjustment, and many other automated functions that provide convenience and reproducible results. Archived Product. Replaced by DMI8 S.
