Proper Citation: Plexon: 16 channel V-Probe (RRID:SCR_018784)

Description: Linear electrode array used for intracranial electrophysiological recordings. V-Probe is multi-use, multi-site, linear electrode with recording sites positioned on side of sharpened, symmetric cone by Plexon Inc. Minimizes trauma to brain tissue upon insertion. Durable, highly customizable, and often used in acute research with medium to large animals.

Resource Type: instrument resource

Keywords: Linear electrode, V-Probe, intracranial electrophysiological recording, Plexon Inc., minimizes trauma, brain tissue, insertion, customizable, animal research, instrument, equipment
