Proper Citation: Northwestern University Evanston Single Cell Genomics Core Facility
(RRID:SCR_026652)

Description: Core dedicated to supporting single cell and spatial biology experiments on the Evanston campus. Home of flow cytometry. Offers single cell encapsulation and library preparation services using the 10X Genomics platform. Provides experiments consultations. Shared use, training, and service facility. Instrumentation includes FACSDiscover S8 flow sorter, LSRFortessa flow analyzer, MERSCOPE spatial transcriptomics platform, 10X Genomics Chromium iX, Eppendorf NX70 Cryostat, QuantStudio 3 real-time PCR, VeritiPro Thermocycler, Agilent Bioanalyzer, Axiovert inverted microscope (DIC, Brightfield, 4 fluorescent channels), Revvity Cellometer K2 automated cell counter, Qubit 4 fluorometer, Nanodrop spectrophotometer. Services include assisted flow cytometry, 10X Genomics library preparation, spatial transcriptomics via MERSCOPE, cell counting, bioanalyzer analysis, bulk library preparation, and low input library preparation.

Synonyms: , Northwestern University Single Cell Genomics Facility, Evanston Single Cell Genomics Core

Resource Type: access service resource, core facility, service resource

Keywords: ABRF, supporting single cell and spatial biology experiments, flow cytometry, single cell encapsulation, library preparation,

Resource Name: Northwestern University Evanston Single Cell Genomics Core Facility

Resource ID: SCR_026652
