Proper Citation: Zeiss: Axio Imager Z2m system (RRID:SCR_027233)

Description: Icahn School of Medicine at Mount Sinai Microscopy and Advanced Bioimaging Core Facility imaging system offers stable imaging conditions, especially crucial for high magnification and time-dependent studies. Z2m model is optimized for materials science applications. It is often used for tasks like 3D subsurface studies of transparent ceramics, metallography, corrosion studies, analysis of thin film uniformity, and inclusion analysis in metals. It is particularly well-suited for situations that require motorized stage to handle large samples.

Resource Type: instrument resource

Keywords: materials science applications, motorized stage to handle large samples,

Specification URL: https://raw.githubusercontent.com/SciCrunch/RRID-Instruments/refs/heads/main/PDF/SCR_027233.pdf

Resource Name: Zeiss: Axio Imager Z2m system

Resource ID: SCR_027233

Alternate IDs: Model_Number_Z2m

Alternate URLs:
