Proper Citation: Asylum Research: MFP-3D-BIO Atomic Force Microscope (RRID:SCR_028565)

Description: Atomic Force Microscope (AFM) designed for bioscience and materials research. It is used to capture high-resolution topographical images and perform precise force measurements on both soft biological samples (like live cells and proteins) and advanced materials at the nanoscale.

Synonyms: Asylum Research MFP-3D-BIO

Resource Type: instrument resource

Keywords: Atomic Force Microscope, microscope, high-resolution topographical images, precise force measurements, soft biological samples, advanced materials, nanoscale

Availability: Commercially available
