Proper Citation: Irritable Bowel Syndrome Outcome Study (RRID:SCR_001504)

Description: Multi-center placebo-controlled randomized clinical trial to assess the short-term and long-term efficacy of cognitive behavior therapy (CBT) for irritable bowel syndrome (IBS) using two treatment delivery systems: self administered CBT and therapist administered CBT. Long term project goals are to develop an effective self-administered behavioral treatment program that can enhance the quality of patient care, improve clinical outcomes, and decrease the economic and personal costs of one of the most prevalent and intractable gastrointestinal disorders.

Abbreviations: IBSOS

Resource Type: clinical trial, resource

Defining Citation: [PMID:22846389](#)

Keywords: gastrointestinal disorder, cognitive behavior therapy, self-management, self-administered

Related Condition: Irritable bowel syndrome

Funding: NIDDK 5U01DK077738-07

Availability: Free

Resource Name: Irritable Bowel Syndrome Outcome Study

Resource ID: SCR_001504

Alternate IDs: nlx_152839

Record Creation Time: 20220129T080207+0000

Record Last Update: 20260808T190546+0000
