DBSubLoc - Database of protein Subcellular Localization

RRID:SCR_002339

Type: Tool

Proper Citation

DBSubLoc - Database of protein Subcellular Localization (RRID:SCR_002339)

Resource Information

URL: <http://www.bioinfo.tsinghua.edu.cn/dbsubloc.html>

Proper Citation: DBSubLoc - Database of protein Subcellular Localization (RRID:SCR_002339)

Description: A database of protein subcellular localization containing proteins from primary protein database SWISS-PROT and PIR. By collecting the subcellular localization annotation, these information are classified and categorized by cross references to taxonomies and Gene Ontology database. Annotations were taken from primary protein databases, model organism genome projects and literature texts, and then were analyzed to dig out the subcellular localization features of the proteins. The proteins are also classified into different categories. Based on sequence alignment, nonredundant subsets of the database have been built, which may provide useful information for subcellular localization prediction. The database now contains >60 000 protein sequences including 30 000 protein sequences in the nonredundant data sets. Online download, SOAP server, Blast tools and prediction services are also available.

Abbreviations: DbSubLoc

Resource Type: data analysis service, data or information resource, data access protocol, database, service resource, production service resource, software resource, analysis service resource, web service

Defining Citation: [PMID:14681374](#)

Keywords: protein, protein database, protein subcellular localization, blast, prediction, subcellular

Funding: National Key Foundational Research of China 863-2002AA23/03/;
