Description: An interactive, user-editable genetic sequence database tool, targeted at molecular biology research groups that can be browsed using tags. The tool is Web 2.0-flavoured, allowing users to do more than just retrieve information. Its focus on user-editability is supported by the use of tags (metadata) associated with genetic sequences. Several methods of retrieving stored data are available including tag-clouds, BLAST and keyword searches. Also, sequence tags related to HGNC gene names, conserved domains (CDD) and GO terms can be automatically generated given sequence data. The tool is constructed using the high-level Python web framework, Django, with a SQLite3 backend.

Synonyms: gutentag - A genetic sequence database for labs that can be browsed using tags

Resource Type: software resource

Defining Citation: [PMID:14640709](#)

Keywords: standalone software, python, django, genetics, sequence

Availability: Free, Available for download, Freely available

Resource Name: Gutentag

Resource ID: SCR_003051

Alternate IDs: OMICS_02396

Record Creation Time: 20220129T080216+0000

Record Last Update: 20260808T185751+0000
