Proper Citation: Rocky Mountain MS Center (RRID:SCR_004354)

Description: The Rocky Mountain MS Center is a patient-centered organization dedicated to changing the way we think about and treat MS in order to protect the futures of those living with the disease. Our mission is to improve the lives of people with Multiple Sclerosis (MS) and their families through care, support, education and research. * Medical Care and Support: We offer a comprehensive care approach that maximizes and enhances the brain's ability to protect and repair itself and to promote quality of life for patients and their families. We incorporate wellness, exercise, diet and stress management, and supportive services in addition to the most progressive medical care. * Education: We empower patients, families and health care providers by sharing what we know. There are 10,000 peer reviewed articles published annually; we sort through that information and share the latest advances. * Research: We are pursuing new treatment approaches to save the brain. We are leading the way to assure that we prevent the silent but ongoing brain damage that results in disability. This means treating early and treating aggressively.
