**Proper Citation:** Karolinska Biobank (RRID:SCR\_004355)

**Description:** KI Biobank is an accredited core facility offering sample collection services. KI Biobank is located at the Department of Medical Epidemiology and Biostatistics. KI Biobank offer infrastructure for pre analytical sample handling and provide researchers guidance on how samples should be taken and labeled. The processes comprise registration, handling, storage and distribution of samples. KI Biobank also offers DNA-extraction from blood and saliva. In order to insure complete traceability on samples and belonging information all processes are controlled by a Laboratory Information Management System (LIMS). For every new study a contract is established describing the study and the disposition rights. We also help in writing Biobank agreements including multicenteravtal and Material Transfer Agreement. KI Biobank is, according to the Biobank law, responsible for all sample collections handled within the core facility and those that are stored on the departments on KI campus. Clinical sample collections are handled by the Biobank units at the respective hospitals within the Stockholm County Council. Besides the samples that are stored centrally at KI Biobank, KI Biobank is also the administrative biobank for research sample collections at Karolinska Institutet that are stored and administrated at the departments. All research sample collections must be reported to KI Biobank. The following types of sample collections are registered in the biobank; sample collections taken within the regular health care that has been transferred to Karolinska Institutet with an agreement of transfer, samples taken from healthy individuals or other persons out of the regular health care and samples that have been taken abroad.

**Abbreviations:** KI Biobank

**Synonyms:** Karolinska Institutet Biobank

**Resource Type:** biomaterial supply resource, material resource

**Keywords:** asthma, lung disease, cancer, cardiac disease, multiple sclerosis, ms, neurological disease, neurological injury, psychiatric disease, twin, dna-extraction

**Related Condition:** Asthma, Lung disease, Cancer, Cardiac disease, Multiple Sclerosis, Neurological disease, Neurological injury, Mental disease, Healthy, Normal control, Twin, Late adult human

**Resource Name:** Karolinska Biobank

**Resource ID:** SCR\_004355

**Alternate IDs:** nlx\_37545

**Old URLs:** <http://ki.se/ki/jsp/polopoly.jsp?d=9620&l=en>

**Record Creation Time:** 20220129T080224+0000

**Record Last Update:** 20260801T191047+0000
