Proper Citation: Key Driver Analysis (RRID:SCR_004899)

Description: Key Driver Analysis (KDA) is an analysis tool, as both an R package and Cytoscape plugin, for identifying key regulators of a gene regulatory network. It takes as input a gene network N (directed or undirected) and a gene set (module) G. The gene set is any subset of genes from the network N (e.g. pathway, module, ontology), permitting focus on a particular biological context. The KDA archive contains the plugin source, the plugin jar file, and several example datasets. Prerequisites: *Java, 5.0+ (www.javasoft.com) *Cytoscape, 2.6+ (www.cytoscape.org)

Abbreviations: KDA

Synonyms: Key Driver Analysis Tool

Resource Type: software resource

Resource Name: Key Driver Analysis
