Proper Citation: MMMDB - Mouse Multiple tissue Metabolome DataBase (RRID:SCR_006064)

Description: MMMDB, Mouse Multiple tissue Metabolome DataBase, is a freely available metabolomic database containing a collection of metabolites measured from multiple tissues from single mice. The datasets are collected using a single instrument and not integrated from literatures, which is useful for capturing the holistic overview of large metabolomic pathway. Currently data from cerebrum, cerebellum, thymus, spleen, lung, liver, kidney, heart, pancreas, testis, and plasma are provided. Non-targeted analyses were performed by capillary electropherograms time-of-flight mass spectrometry (CE-TOFMS) and, therefore, both identified metabolites and unknown (without matched standard) peaks were uploaded to this database. Not only quantified concentration but also processed raw data such as electropherogram, mass spectrometry, and annotation (such as isotope and fragment) are provided.

Abbreviations: MMMDB

Synonyms: Mouse Multiple tissue Metabolome DataBase

Resource Type: data analysis service, data or information resource, database, service resource, production service resource, analysis service resource

Defining Citation: [PMID:22139941](#)

Keywords: metabolite, metabolome, cerebrum, cerebellum, thymus, spleen, lung, liver, kidney, heart, pancreas, testis, plasma, metabolomic pathway, capillary electropherograms time-of-flight mass spectrometry, electropherogram, mass spectrometry, annotation, isotope, fragment, bio.tools

Availability: Free

Resource Name: MMMDB - Mouse Multiple tissue Metabolome DataBase
