Proper Citation: NEMBASE (RRID:SCR_006070)

Description: NEMBASE is a comprehensive Nematode Transcriptome Database including 63 nematode species, over 600,000 ESTs and over 250,000 proteins. Nematode parasites are of major importance in human health and agriculture, and free-living species deliver essential ecosystem services. The genomics revolution has resulted in the production of many datasets of expressed sequence tags (ESTs) from a phylogenetically wide range of nematode species, but these are not easily compared. NEMBASE4 presents a single portal into extensively functionally annotated, EST-derived transcriptomes from over 60 species of nematodes, including plant and animal parasites and free-living taxa. Using the PartiGene suite of tools, we have assembled the publicly available ESTs for each species into a high-quality set of putative transcripts. These transcripts have been translated to produce a protein sequence resource and each is annotated with functional information derived from comparison with well-studied nematode species such as *Caenorhabditis elegans* and other non-nematode resources. By cross-comparing the sequences within NEMBASE4, we have also generated a protein family assignment for each translation. The data are presented in an openly accessible, interactive database. An example of the utility of NEMBASE4 is that it can examine the uniqueness of the transcriptomes of major clades of parasitic nematodes, identifying lineage-restricted genes that may underpin particular parasitic phenotypes, possible viral pathogens of nematodes, and nematode-unique protein families that may be developed as drug targets.

Abbreviations: NEMBASE

Synonyms: NEMBASE4, NEMBASE4 - Nematode Transcriptome Analyses

Resource Type: data analysis service, data or information resource, database, service resource, production service resource, analysis service resource

Defining Citation: [PMID:21550347](#), [PMID:14681449](#)

Keywords: nematode, transcriptome, expressed sequence tag, protein, cluster, library, sequence, peptide prediction, functional annotation, gene family, gene, annotation, pathway, genome, partigene, bio.tools

Funding: Wellcome Trust ;
Hospital for Sick Children ;
BBSRC ;
MRC ;
NERC

Availability: Public

Resource Name: NEMBASE

Resource ID: SCR_006070

Alternate IDs: nlx_151476, biotools:nembase4

Alternate URLs: <https://bio.tools/nembase4>

Record Creation Time: 20220129T080234+0000

Record Last Update: 20260801T190304+0000

Ratings and Alerts

No rating or validation information has been found for NEMBASE.

No alerts have been found for NEMBASE.
