Description: Database of canonical and non-canonical mammalian splice sites. The information about verified splice site sequences for canonical and non-canonical sites is presented with the supporting evidence. Weight matrices were built for the major splice groups, which can be incorporated into gene prediction programs.

Abbreviations: SpliceDB

Synonyms: SpliceDB: canonical and non-canonical splice site sequences in mammalian genes

Resource Type: data set, data or information resource

Defining Citation: PMID:11125105, PMID:11058137

Keywords: gene, expressed sequence tag, splice, canonical, non-canonical, splice site, sequence, data set, splice site sequence

Resource Name: SpliceDB
