Proper Citation: British Columbia Breast Cancer Tumour Bank (RRID:SCR_006671)

Description: The Molecular Oncology department hosts the breast cancer tumour tissue repository (BREAST-TTR), a project within the agency-wide tumour tissue repository. The BREAST-TTR comprises several important banks of breast tissues, contemporaneous as well as archival. The main banks are: * 3000 frozen breast cancers, linked to 15 year outcomes data from the BCCA Breast Cancer Outcomes Unit. This archival bank consists of frozen tissue, DNA and RNA, and a tissue microarray of the cases. * Live-cryopreserved cancers. At present around 50 individual cases of metastatic breast cancer, with tumour material cryopreserved for subsequent cell culture/xenograft work. * Contemporaneous bank. Between the TTR in Victoria and the accrual site in Vancouver, approximately 1300 contemporaneous (within last 4 years) breast cancers with matched normal DNA and outcomes linkages.

Abbreviations: BREAST-TTR

Synonyms: British Columbia Breast Tumour Bank, Breast Cancer Tumour Tissue Repository, British Columbia Breast Cancer Tumour Tissue Repository, British Columbia Breast Cancer Tumor Tissue Repository

Resource Type: biomaterial supply resource, material resource, tissue bank

Keywords: breast cancer, tumor, tissue, breast tissue, frozen tissue, dna, rna, tissue microarray, live-cryopreserved cancer, metastatic breast cancer, cryopreserved, matched normal dna

Related Condition: Breast cancer, Tumor, Metastatic breast cancer, Matched normal

Resource Name: British Columbia Breast Cancer Tumour Bank

Resource ID: SCR_006671

Alternate IDs: nlx_50799
