## Cscan

RRID:SCR\_006756

Type: Tool

### Proper Citation

Cscan (RRID:SCR\_006756)

### Resource Information

**URL:** <http://159.149.160.51/cscan/>

**Proper Citation:** Cscan (RRID:SCR\_006756)

**Description:** Data resource that includes a large collection of genome-wide ChIP-Seq experiments performed on transcription factors (TFs), histone modifications, RNA polymerases and others. Enriched peak regions from the ChIP-Seq experiments are crossed with the genomic coordinates of a set of input genes, to identify which of the experiments present a statistically significant number of peaks within the input genes' loci. The input can be a cluster of co-expressed genes, or any other set of genes sharing a common regulatory profile. Users can thus single out which TFs are likely to be common regulators of the genes, and their respective correlations. Also, by examining results on promoter activation, transcription, histone modifications, polymerase binding and so on, users can investigate the effect of the TFs (activation or repression of transcription) as well as of the cell or tissue specificity of the genes' regulation and expression.

**Abbreviations:** Cscan

**Resource Type:** data analysis service, data or information resource, database, service resource, production service resource, analysis service resource

**Defining Citation:** [PMID:22669907](#)

**Keywords:** regulator, gene, genome-wide chip-seq, chip-seq, gene, genome

**Availability:** Free

**Resource Name:** Cscan

**Resource ID:** SCR\_006756

**Alternate IDs:** OMICS\_00529

**Record Creation Time:** 20220129T080238+0000

## Ratings and Alerts

No rating or validation information has been found for Cscan.

No alerts have been found for Cscan.
