Proper Citation: Mental Illness Research Education and Clinical Center (RRID:SCR_006956)

Description: The Mental Illness Research, Education and Clinical Centers (MIRECC) were established by Congress with the goal of researching the causes and treatments of mental disorders and using education to put new knowledge into routine clinical practice in the VA. Congress established MIRECCs in October 1996 through Public Law 104-262. There are currently 10 MIRECCs. Each MIRECC focuses on mental illnesses or conditions that are common in Veterans. MIRECCs investigate the causes of mental illness, develop new treatments for mental illness, and evaluate both established and new treatments with the goal of identifying best practices. The MIRECCs also develop educational and training initiatives to implement best practices into the clinical settings of the VA. Each MIRECC works with all the facilities in its network (region) on research, education and clinical initiatives, evaluating services offered to the Veteran and helping the networks implement improved treatments, services, or practices. Several educational products are posted on this site on the Products page. These materials are in the public domain and available for your use. Many MIRECCs have additional materials that can be downloaded from their web sites or are available by request.

Abbreviations: MIRECC

Resource Type: institution

Keywords: mental disease

Resource Name: Mental Illness Research Education and Clinical Center
