Proper Citation: Translating Time across developing mammalian brains (RRID:SCR_007424)

Description: Web tool for translating neurodevelopmental time across species and predicting neurodevelopmental events. This tool was created because clinicians and researchers rely on neurodevelopment data obtained from a variety of non-human species, it is essential to be able to relate studies across the different experimental animals, and ultimately to humans, in an easily accessible format. This web site is based on a mathematical model originally described by Finlay and Darlington (Science, 268:1578-84) that predicts post conception (PC) dates using log transformations. It integrates hundreds of empirically-derived neural events to translate neurodevelopmental time across hamsters, mice, rats, rabbits, spiny mice, guinea pigs, ferrets, cats, rhesus monkeys and humans.

Synonyms: Translating Time

Resource Type: database, data or information resource, software resource

Keywords: events, ferrets, finlay, age, age correlation, age interpretation, age translation, algorithms, cats, chronometric, chronometry, darlington, development, gestation, guinea pigs, hamsters, humans, mammalian, mice, model, neurodevelopmental, neurogenesis, prediction, rabbits, rats, rhesus monkeys, spiny mice, time, translate, translation, FASEB list

Related Condition: Aging

Resource Name: Translating Time across developing mammalian brains

Resource ID: SCR_007424

Alternate IDs: nif-0000-00533

Record Creation Time: 20220129T080241+0000

Record Last Update: 20260803T040508+0000

Ratings and Alerts

No rating or validation information has been found for Translating Time across developing mammalian brains.

No alerts have been found for Translating Time across developing mammalian brains.
