Description: THIS RESOURCE IS NO LONGER IN SERVICE, documented January 24, 2019. Core aims to promote multidisciplinary collaboration, and enhance the research excellence and productivity of CRCH by providing access to biomedical informatics expertise and computational support to all members of the Center. The prime objective of the ISR is to facilitate the management, sharing, and integration of diverse data types in cancer research, as well as the synthesis and analysis of more focused data sets from the basic, clinical, genomics and population sciences. The bioinformatics group of the ISR supports a dedicated scientific computing network for computational cancer biology, and leads the development and application of advanced algorithms and software tools that enable Center investigators to take a more integrative approach to cancer research for the purpose of accelerating the translation of basic research results into the clinic.
