UBERON

RRID:SCR_010668

Type: Tool

Proper Citation

UBERON (RRID:SCR_010668)

Resource Information

URL: <http://uberon.org>

Proper Citation: UBERON (RRID:SCR_010668)

Description: An integrated cross-species anatomy ontology representing a variety of entities classified according to traditional anatomical criteria such as structure, function and developmental lineage. The ontology includes comprehensive relationships to taxon-specific anatomical ontologies, allowing integration of functional, phenotype and expression data. Uberon consists of over 10000 classes (March 2014) representing structures that are shared across a variety of metazoans. The majority of these classes are chordate specific, and there is large bias towards model organisms and human.

Abbreviations: UBERON

Synonyms: Uber anatomy ontology, Uber-anatomy ontology

Resource Type: data or information resource, ontology, controlled vocabulary

Defining Citation: [PMID:22293552](https://pubmed.ncbi.nlm.nih.gov/22293552/)

Keywords: anatomy, comparative, evolution, organ system, anatomical structure, body part, organ, tissue, body, vertebrate, function, phenotype, expression, model organism, obo
