Proper Citation: Max Planck Institute for Infection Biology; Berlin; Germany (RRID:SCR_011377)

Description: The Max Planck Institute for Infection Biology was founded in 1993. The Institute commenced its operation in a provisional laboratory facility and a small group of scientists that has greatly expanded over the years, and relocated to an especially built facility in summer 2000. The new facility is located in the heart of Berlin on the historical Charite medical campus, where Robert Koch and Emil Behring had made their important discoveries paving the field of infection research, in close proximity to the Parliament house and the newly constructed government offices. The choice of the location was to support the goal of the Institute to research infectious diseases in close collaboration with universities and clinical units.

Abbreviations: MPIIB

Synonyms: Max-Planck-Institut f??r Infektionsbiologie, Max Planck Institute for Infection Biology

Resource Type: institution

Resource Name: Max Planck Institute for Infection Biology; Berlin; Germany

Resource ID: SCR_011377

Alternate IDs: nlx_14296
