Description: The Experimental Pathology Shared Resource Laboratory is a non-profit laboratory that provides investigators with centralized, comprehensive histological services. The laboratory currently works with over 70 investigators at the University of Arkansas, regionally, and nationally. By providing a centralized laboratory, we offer convenient access to all services within one facility, save costs for investigators and the institution, increase efficiency of sample processing, eliminate duplication of services and equipment, and maintain stringent quality control standards. The laboratory director, consultants, and technicians have extensive experience in routine histology and immunohistochemistry involving both human and animal tissues.
