## UC Davis Crocker Nuclear Laboratory

RRID:SCR\_012486

Type: Tool

### Proper Citation

UC Davis Crocker Nuclear Laboratory (RRID:SCR\_012486)

### Resource Information

**URL:** <http://www.scienceexchange.com/facilities/crocker-nuclear-laboratory-uc-davis>

**Proper Citation:** UC Davis Crocker Nuclear Laboratory (RRID:SCR\_012486)

**Description:** Crocker Nuclear Laboratory hosts a diverse group of research programs, nearly all of which are related to applied science programs. Constructed in the mid-sixties, CNL, houses a low energy particle accelerator. The accelerator, an isochronous cyclotron, is one of the few of this design remaining in productive operation. The Crocker Nuclear Laboratory's Isochronous Cyclotron began operating in 1965, accelerating protons, alpha particles, and other light ions into various targets to study nuclear structure. Instead of the uniform magnetic fields used in the earlier cyclotrons, the isochronous design employed tailored sectors with a varying magnetic field. This design compensated for increases in the mass of ions as they accelerated, both focusing their paths and keeping them in resonance at high energies. In its day, this design was considered a major technological breakthrough.

**Abbreviations:** UCD CNL

**Synonyms:** University of California Davis Crocker Nuclear Laboratory

**Resource Type:** core facility, service resource, access service resource

**Resource Name:** UC Davis Crocker Nuclear Laboratory

**Resource ID:** SCR\_012486

**Alternate IDs:** SciEx\_245

**Record Creation Time:** 20220129T080310+0000

**Record Last Update:** 20260801T191220+0000

### Ratings and Alerts

No rating or validation information has been found for UC Davis Crocker Nuclear Laboratory.

No alerts have been found for UC Davis Crocker Nuclear Laboratory.
