Description: Base Pair Biotechnologies offers its customers a total solution for developing novel aptamer-based technologies. In addition to our numerous institutional customers, we support companies developing products ranging from: basic research detection, to clinical diagnostics, to therapeutic lead development. Our platform technology is a patent pending, multiplexed approach to aptamer discovery. This allows us to offer de novo aptamer discovery services at unprecedented speed and throughput. Our expertise in aptamer and related assay development allows us to support our customers in a wide range of novel applications.
