Proper Citation: Cuffmerge (RRID:SCR_015688)

Description: The main purpose of Cufflinks.cuffmerge is to merge together several Cufflinks assemblies, making it easier to produce an assembly GTF file suitable for use with Cufflinks.cuffdiff. Cufflinks.cuffmerge also runs Cuffcompare in the background and automatically filters out transcribed fragments (transfrags) that are likely to be artifacts. Trapnell C, Hendrickson D, Sauvageau S, Goff L, Rinn JL, Pachter L. Differential analysis of gene regulation at transcript resolution with RNA-seq. Nature Biotechnology. 2013;31:46-53.

Resource Type: software tool

Resource Name: Cuffmerge

Resource ID: SCR_015688

Record Creation Time: 20220129T080327+0000

Record Last Update: 20260829T182518+0000

Ratings and Alerts

No rating or validation information has been found for Cuffmerge.

No alerts have been found for Cuffmerge.
