Proper Citation: Rodent Arena Tracker project (RRID:SCR_021408)

Description: Project related to rodent tracking and task control. Provides closed loop system for machine vision rodent tracking and task control created by scientist from Washington University. System to track and report mouse activity while they are contained in simple arena. System uses OpenMV M7 microcontroller to acquire images of arena and process them in real-time to report mouse centroid data to text file. Wireless position tracker for automatically tracking mice in high contrast arenas.

Abbreviations: RAT
