Proper Citation: University of Nebraska Medical Center Multiphoton Intravital and Tissue Imaging Core Facility (RRID:SCR_022478)

Description: Core provides intravital imaging equipment to acquire advanced descriptive and quantitative data for imaging studies. Includes Olympus FVMPE-RS advanced multiphoton microscope, multichannel, multiphoton excitation system specifically tailored for intravital and deep tissue imaging. System is additionally equipped with 458 and 588 nm stimulation laser lines for photobleaching, light stimulation and/or photoactivation of various fluorescent or caged constructs. Uses Spectra-Physics InSight X3 dual-line, tunable multiphoton laser for ultrafast, multichannel imaging. Available Neurotar Mobile Home Cage allows researchers to integrate real-time imaging with behavioral/locomotion tracking. Offers training and access to imaging system, support in design of experimental procedures, acquisition of image data, and analysis of acquired images.

Abbreviations: MITI

Synonyms: University of Nebraska Medical Center UNMC Multiphoton Intravital & Tissue Imaging (MITI) Core, UNMC Multiphoton Intravital & Tissue Imaging (MITI) Core

Resource Type: access service resource, core facility, service resource

Keywords: USEDit, ABRF, intravital imaging, imaging studies, tissue imaging

Availability: open

Resource Name: University of Nebraska Medical Center Multiphoton Intravital and Tissue Imaging Core Facility

Resource ID: SCR_022478

Alternate IDs: ABRF_1376

Alternate URLs: <https://coremarketplace.org/?FacilityID=1376&citation=1>

Record Creation Time: 20220614T050142+0000

Record Last Update: 20260821T194231+0000

Ratings and Alerts

No rating or validation information has been found for University of Nebraska Medical Center Multiphoton Intravital and Tissue Imaging Core Facility.

No alerts have been found for University of Nebraska Medical Center Multiphoton Intravital and Tissue Imaging Core Facility.
