Description: Software tool for detecting structural variants in sequencing data using genome wide local assembly. Genome wide detection of structural variants and indels by local assembly. Used for detecting SVs from short read sequencing data using genome wide local assembly with low memory and computing requirements.

Resource Type: data analysis software, data processing software, sequence analysis software, software application, software resource

Defining Citation: [PMID:29535149](https://pubmed.ncbi.nlm.nih.gov/29535149/)

Keywords: genome wide detection, structural variants, indels, local assembly

Funding: Broad Institute ;
DFCI-Novartis Drug Discovery Program ;
NCI R01CA188228;
NCI U54CA143798;
