Proper Citation: FFTrees (RRID:SCR_023359)

Description: Software package as decision algorithms for solving binary classification problems. Faster and more frugal because every node allows making decision. Apart from being faster and requiring less information, FFTs tend to be robust against overfitting, and are easy to interpret, use, and communicate.

Synonyms: Fast-and-Frugal Trees

Resource Type: software resource, software toolkit

Defining Citation: [DOI:10.1017/S1930297500006239](https://doi.org/10.1017/S1930297500006239)

Keywords: decision algorithm, solving binary classification problems, binary classification,

Availability: Free, Available for download, Freely available
