Proper Citation: ELOKA (RRID:SCR_026990)

Description: Project portal to collect, preserve, and exchange local observations and Indigenous Knowledge. Collaborates with Arctic communities and Indigenous organizations, schools, and researchers to create customized data management products. ELOKA provides open and tailored data access, data stewardship for Indigenous communities, and services ranging from advising on data sharing ethics and protocols to handling different data types. Interactive digital atlases showcasing community-based observations of social and environmental change and related geospatial data, such as trail locations, place names, land-use demarcations, or local climate information. Customized websites containing cultural, historical, and/or environmental information significant to partner communities, often in the form of written interview transcripts, audio or video files, photographs, artwork, illustrations, and maps. Data sets of environmental and wildlife observations collected by Indigenous experts. Access to local weather station data, including temperature, snow thickness, and wind data.

Synonyms: Exchange for Observations and Local Knowledge of the Arctic

Resource Type: project portal, data or information resource, data repository, service resource, portal, storage service resource

Keywords: Arctic communities, Indigenous organizations, local observations, social and environmental change, geospatial data, cultural information, historical and environmental information, wildlife observations,

Funding: National Science Foundation

Availability: Free, Freely available
