Proper Citation: University of Massachusetts Chan Medical School Metabolomics Core Facility (RRID:SCR_027036)

Description: Core offers the ability to perform both targeted (including stable isotope tracing studies) and untargeted metabolomics and lipidomics experiments using liquid- and gas-chromatography mass spectrometry (LCMS/MS and GCMS) on a fee-for-service basis. Offers expertise to assist with every stage of the metabolomics/ lipidomics experimental pipeline, including experimental design, method development, data acquisition and processing, data analysis and interpretation. Offers training on data analysis software including both open-source and vendor proprietary analysis software. Offers access to specialized equipment required for metabolomics/ lipidomics sample extraction and preparation, including a Cryomill and Bead Beater for homogenization of tumors, tissue, stool and whole organisms, and a liquid-handling robot for large scale plasma extractions.

Synonyms: UMass Chan Medical School Metabolomics Core

Resource Type: service resource, core facility, access service resource

Keywords: ABRF, metabolomics and lipidomics experiments, liquid- and gas-chromatography mass spectrometry, experimental design, method development, data acquisition and processing, data analysis and interpretation,

Resource Name: University of Massachusetts Chan Medical School Metabolomics Core Facility

Resource ID: SCR_027036

Alternate IDs: ABRF_3254
