Proper Citation: Northwestern University Immunotherapy Assessment Core Facility (RRID:SCR_027869)

Description: Core provides services for dissection of the immune response both phenotypically, functionally and transcriptionally at the single cell or population level. Technologies like single cell RNAseq (10x Genomics Chromium platform), multispectral fluorescent tissue imaging of FFPE tissues (Vectra 3 Imaging System, Akoya Biosciences), high-performance electrochemiluminescence plexing immunoassays (QuickPlex 120, MSD), and automated multiplexed single-cell and bulk protein analysis system (IsoLight, IsoPlexis) are available to investigators, providing immune cell (and beyond) characterization at the highest resolution. Other services also include project consultation, sample preparation, controlled rate freezing and cryopreservation/storage, as well as a comprehensive range of standardized and customizable immunological assays.

Synonyms: Northwestern University Immunotherapy Assessment Core

Resource Type: core facility, access service resource, service resource

Keywords: ABRF, immune monitoring services, immunoassays, mIHC, spatial biology, sc RNAseq, multispectral fluorescent tissue imaging of FFPE tissues, electrochemiluminescence plexing immunoassay

Resource Name: Northwestern University Immunotherapy Assessment Core Facility

Resource ID: SCR_027869
