Proper Citation: AIDS.org (RRID:SCR_005537)

Description: The mission of AIDS.ORG is to help prevent HIV infections and to improve the lives of those affected by HIV and AIDS by providing education and facilitating the free and open exchange of knowledge at an easy-to-find centralized website. AIDS.ORG makes access to important AIDS information easier and faster. We provide prevention, testing, and treatment information currently to well over 4 million people a year. AIDS.ORG has been awarded the Health on the Net Foundation Code of Conduct (HONcode) seal for reliability and credibility of information in the field of healthcare. Additionally, every year over 2.4 million young people under the age of 25 turn to AIDS.ORG, making us an important resource since over 50% of all new HIV infections in the USA occur in this age group. AIDS.ORG, Inc. is a nonprofit 501(c) (3) educational organization, and maintains a very strict privacy policy. We make it our goal to be the best starting point for someone looking for AIDS information on the Internet. Our intent is that users be directed to the best information on the topic they're investigating. We bring people together to share knowledge and experiences. In the past, we also provided the very first Internet-based program of accredited AIDS education for medical professionals, allowing doctors in rural and isolated areas to better serve AIDS patients.

Abbreviations: AIDS.org
