Proper Citation: microRNA.org (RRID:SCR_006997)

Description: Database of microRNA target predictions and expression profiles. Target predictions are based on a development of the miRanda algorithm which incorporates current biological knowledge on target rules and on the use of an up-to-date compendium of mammalian microRNAs. MicroRNA expression profiles are derived from a comprehensive sequencing project of a large set of mammalian tissues and cell lines of normal and disease origin. This website enables users to explore: * The set of genes that are potentially regulated by a particular microRNA. * The implied cooperativity of multiple microRNAs on a particular mRNA. * MicroRNA expression profiles in various mammalian tissues. The web resource provides users with functional information about the growing number of microRNAs and their interaction with target genes in many species and facilitates novel discoveries in microRNA gene regulation. The microRNA Target Detection Software, miRanda, is an algorithm for finding genomic targets for microRNAs. This algorithm has been written in C and is available as an open-source method under the GPL., THIS RESOURCE IS NO LONGER IN SERVICE. Documented on September 16,2025.

Abbreviations: microRNA.org

Synonyms: microRNA.org - Targets and Expression

Resource Type: data or information resource, database, software resource

Defining Citation: [PMID:18158296](https://pubmed.ncbi.nlm.nih.gov/18158296/)

Keywords: microrna, gene, expression, gene regulation, FASEB list

Funding: NIGMS ;
Atlantic Philanthropies ;
Alfred W. Bressler Scholars Endowment Fund

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: microRNA.org

Resource ID: SCR_006997

Alternate IDs: nif-0000-03127, OMICS_00402

Record Creation Time: 20220129T080239+0000

Record Last Update: 20260903T234852+0000

Ratings and Alerts

No rating or validation information has been found for microRNA.org.
