Proper Citation: Autoaligner (RRID:SCR_007355)

Description: Microtomy is a standard technique used for 2D microscopy, but it can also provide the foundation for 3D analysis using AutoAligner. AutoAligner reads a stack of serial sections and automatically aligns the single images, building up a 3D space that can be explored using Imaris. Each image is aligned in translation and rotation relative to its precursor image in the sequence. In addition to a fully automated mode, AutoAligner also provides manual control for neighboring images that are too different from each other for automatic alignment. The visual alignment tool uses fast display techniques for aligning images in real time.

Resource Type: data analysis software, data processing software, software application, software resource

Resource Name: Autoaligner

Resource ID: SCR_007355

Alternate IDs: nif-0000-00266

Record Creation Time: 20220129T080241+0000

Record Last Update: 20260912T195653+0000

Ratings and Alerts

No rating or validation information has been found for Autoaligner.

No alerts have been found for Autoaligner.

Data and Source Information

Usage and Citation Metrics

We found 25 mentions in open access literature.

Listed below are recent publications. The full list is available at [T1D](#) .
