Description: Research-based medical science department of physiology and pharmacology in the Schulich School of Medicine and Dentistry at the University of Western Ontario that focus on biological processes from the cellular-molecular level to the integrative-systemic level, and on the effects of drugs and environmental agents on these processes. Their areas of research excellence include the physiology and pharmacology of the cardiovascular, neural, reproductive, endocrine and musculoskeletal systems. Several faculty work in the area of developmental biology related to these organ systems. Faculty members in this Department are leaders in nationally-funded collaborative research programs studying skeletal / bone development and biology, heart and vascular biology, cell communication and gap junctions, neural control of vision and movement, and osteoarthritis and pain. Funding from several large infrastructure grants from both national and provincial governments has facilitated the development of state-of-the-art research laboratories and core facilities.
