Proper Citation: Alzheimer's Association International Research Grant Program (RRID:SCR_008775)

Description: An organization that funds research for Alzheimer's disease, provides information on new treatment strategies, provides information on caring for afflicted people, and generally increases public knowledge of disease prevention. This program financially supports new Alzheimer's studies. These research projects are selected by the Medical and Scientific Advisory Council. The council chooses which studies to address based on their potential uses in diagnostics, genetics, treatments, prevention, early detection and general enhancement of lifestyle.
