Proper Citation: G Protein-Coupled Receptor BioAssays Ontology (RRID:SCR_010324)

Description: Ontology (http://www.bioassayontology.org/bao_gpcr) that describes pharmacology, biochemistry and physiology of these important and therapeutically promising class of academic and pharmaceutical research targets. Incorporation and comparison of various small molecule screening data sets, such as those deposited in PubChem, ChEMBL, KEGG, PDSP, and/or IUPHAR databases, requires a formalized electronic organization system. In order to bridge the gap between the overflow of HTS data and the bottleneck of integrated analysis tools, herein, we provide the first comprehensive GPCR ontology. The development and utility of GPCR ontology was based on previously developed BioAssay Ontology (BAO). The GPCR ontology contains information about biochemical, pharmacological, and functional properties of individual GPCRs as well as GPCR-selective ligands inclusive of their HTS screening results and other records. This provides the first all-inclusive GPCR ontology with all available data to model the relationship between the GPCR binding sites and their physiologic and pharmacologic role in physiology via small molecule chemical structures. We developed this system using emerging semantic technologies, by leveraging existing and descriptive domain level ontologies.

Abbreviations: BAO-GPCR

Resource Type: controlled vocabulary, data or information resource, ontology

Keywords: owl

Resource Name: G Protein-Coupled Receptor BioAssays Ontology

Resource ID: SCR_010324

Alternate IDs: nlx_157410

Record Creation Time: 20220129T080258+0000

Record Last Update: 20260903T235018+0000

Ratings and Alerts

No rating or validation information has been found for G Protein-Coupled Receptor BioAssays Ontology.

No alerts have been found for G Protein-Coupled Receptor BioAssays Ontology.
