Proper Citation: Journalysis (RRID:SCR_014015)

Description: A database where researchers can read and post reviews of publishing experiences with scientific journals. When writing comments, reviewers are advised to provide facts where possible, be specific, be honest, check the review, and offer constructive criticism when writing a negative report. Journalysis collates submitted reviews and data for each journal and provides useful summary information (metrics). Authors wanting to find out more about specific journals can search its databases and find the best journal for their next manuscript submission. Journals can use these reviews and metrics to demonstrate high publishing standards, or to improve standards where reviews may be negative.

Resource Type: collaboration tool, data or information resource, database, software resource

Keywords: database, review, journal review, review logistics, collaboration tool

Availability: Free, Public, The community can contribute to this resource
