Proper Citation: CNrun (RRID:SCR_014761)

Description: Neuronal network model simulator for both individual neurons and networks of neurons. It uses NeuroML for network description. Various neuron and synapse model types are supported. CNN features include: an integration cycle which uses a Runge–Kutta 6-5-order method, extensive scripting capabilities, individual unit state introspection from scripts, and neuroplastic processes identified by label or regexp.

Resource Type: simulation software, software application, software resource, source code, standalone software

Keywords: neuron, synapse, neural network, model, simulator, simulation software, source code, standalone software

Availability: Available for download

Resource Name: CNrun

Resource ID: SCR_014761
