Proper Citation: Sanford Burnham Prebys Medical Discovery Institute Tumor Analysis
(RRID:SCR_014858)

Description: Facility that provides analysis of animal models of human cancer and other diseases. It provides investigators access to a wide variety of human cancer cell lines for xenograft studies, some primary human xenograft models and additional transgenic mouse solid tumors and leukemia models. The core also offers serial passaging of tumors and derivation of 2D and 3D cultures from xenograft tumors, including patient-derived xenograft (PDX) models. These short-term cell cultures established from PDXs enable in vitro analysis including high throughput screening with compounds or RNAi for functional characterization.

Synonyms: SBP Tumor Analysis, SBP Medical Discovery Institute Tumor Analysis

Resource Type: biomaterial supply resource, material resource

Keywords: animal, cancer, disease, tumor, xenograft, transgenic, mouse, leukemia, patient derived xenograft, pdx, rna, functional characterization

Availability: Commercially available

Resource Name: Sanford Burnham Prebys Medical Discovery Institute Tumor Analysis

Resource ID: SCR_014858

Record Creation Time: 20220129T080322+0000

Record Last Update: 20260725T191258+0000
