Description: Software package for hydrodynamic data from analytical ultracentrifugation experiments. Features integrated data editing and analysis environment with portable graphical user interface. Provides resolution for sedimentation velocity experiments using high-performance computing modules for 2-dimensional spectrum analysis, genetic algorithm, and for Monte Carlo analysis.

Resource Type: software application, software resource, data analysis software, data processing software

Keywords: Hydrodynamic data, analytical ultracentrifugation experiment, data editing, analysis, sedimentation velocity experiment, spectrum analysis, genetic algorithm, Monte Carlo analysis
