Description: VersaXRM-500 from Xradia VersaXRM family is the latest generation of 3D X-ray microscopy (XRM) solutions optimized for non-destructive micro tomography. The VersaXRM-500 advances industry and science with a versatile combination of world-leading resolution and contrast, sample flexibility and the large working distance required to address emerging research challenges. The system's source technology and high resolution detector provide unmatched sub-micron resolution, even for large samples.
