Proper Citation: RRID:RRRC_00697

Description: Rattus norvegicus with name W/LnneRrrc from RGD.

Species: Rattus norvegicus

Notes: Wistar rats maintained at the animal facility of the Ribeirao Preto School of Medicine at the University of Sao Paulo, Brazil, were tested for audiogenic seizures, using as criteria an SI and the L1 (ref. RGD:14695082). The WAR colony foundation stock was produced by mating animals displaying at least procursive behaviors in three consecutive tests, one every 4 days (two males and four females). Each couple produced two or three litters, from which selected individuals displaying the highest SI and shortest L1 were mated, at adult age, with their fathers and mothers. From the second generation on, brother and sister matings were done, in a ratio of one male to two females, selected according to the criteria above. [Rat Resource and Research Center](#)

Catalog Number: 00697

Background: inbred

Database: Rat Resource and Research Center (RRRC)

Database Abbreviation: RRRC

Availability: Unknown

Alternate IDs: RGD_14695083, 14695083, RRRC_697, RRRC_0697, RRRC_00697

Organism Name: W/LnneRrrc Audiogenic Wistar rat

Record Creation Time: 20230607T202008+0000

Record Last Update: 20260905T094655+0000

Ratings and Alerts

No rating or validation information has been found for W/LnneRrrc Audiogenic Wistar rat.

No alerts have been found for W/LnneRrrc Audiogenic Wistar rat.
