**Description:** A brain bank which provides brain tissue for interdisciplinary research in neurochemical, anatomical, epidemiological and clinical aspects of Alzheimer's disease. It provides brain tissue from Alzheimer's patients and healthy elderly brain donors to investigators who are helping further the understanding of Alzheimer's disease through research. It also gives family members of Alzheimer's patients the opportunity to obtain a confirmed diagnosis through brain autopsy. Through this program, families of individuals with either a clinical diagnosis, or those with suspected Alzheimer's disease, grant permission for a brain autopsy to be performed immediately after death.
