Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented October 5, 2017.

Database management system developed to handle the increasingly large and diverse datasets collected as part of the MBIRN and FBIRN collaboratories and throughout clinical imaging communities at large. The HID can be extended to contain relevant information concerning experimental subjects, assessments of subjects, the experimental data collected, the experimental protocols, and other metadata normally included with experiments.

Abbreviations: HID

Synonyms: fBIRN Data Repository, Human Imaging Database (HID) System, Function BIRN Data Repository

Resource Type: data repository, service resource, software application, source code, database, software resource, image repository, data or information resource, data management software, storage service resource
