DeconSeq

RRID:SCR_007006

Type: Tool

Proper Citation

DeconSeq (RRID:SCR_007006)

Resource Information

URL: <http://deconseq.sourceforge.net/>

Proper Citation: DeconSeq (RRID:SCR_007006)

Description: Software tool to automatically detect and efficiently remove sequence contaminations from genomic and metagenomic datasets. It is easily configurable and provides a user-friendly interface. The user can upload FASTA or FASTQ files and select the databases used for contamination screening, including seven human genomes, bacterial genomes, and viral genomes. The user can set the thresholds interactively and see the results directly using the functionality of the graphical interface. The results can be downloaded in joined or separated files in different formats. The coverage-identity plots provide additional information that can guide the selections of the thresholds using color coded points and connecting lines.

Synonyms: DECONtamination of SEQuence data, decontamination of sequence data

Resource Type: software application, data analysis software, sequence analysis software, software resource, data processing software

Keywords: microbiome, sequence analysis, genomic, metagenomic, datasets, contamination, decontamination, FASEB list

Availability: Available for download

Resource Name: DeconSeq

Resource ID: SCR_007006

Alternate IDs: OMICS_01418

License: GNU General Public License v3

Record Creation Time: 20220129T080239+0000

Record Last Update: 20260729T044142+0000

Ratings and Alerts

No rating or validation information has been found for DeconSeq.

No alerts have been found for DeconSeq.
