Proper Citation: Vir-Mir (RRID:SCR_007971)

Description: A database containing predicted viral miRNA candidate hairpins. Users may query the putative miRNA hairpins of a specific viral species by the hierarchical menu or by search function using the GenBank Identifier or RefSeq accession number. In addition, users can also search for the putative target genes of a particular viral miRNA hairpins by a RNAhybrid service link. We have previously identified human intronic microRNA as well as zebrafish microRNA. The microRNA hairpin discovery pipeline was also applied to discover viral encoded microRNAs. All viral genomes were obtain from NCBI. The classification of virus is based on the taxonomy table of NCBI (Jun, 2006). Totally, the genomes of 2266 viruses were analyzed. The 3'-UTR regions of human, mouse, rat, zebrafish, arabidopsis and rice genes are available for search.

Synonyms: Vir-Mir

Resource Type: data or information resource, database

Keywords: hairpin, microrna, mirna, viral genome, viral mirna

Resource Name: Vir-Mir

Resource ID: SCR_007971

Alternate IDs: nif-0000-03631

Record Creation Time: 20220129T080244+0000

Record Last Update: 20260821T193825+0000

Ratings and Alerts

No rating or validation information has been found for Vir-Mir.

No alerts have been found for Vir-Mir.
